Preparing for the NVIDIA DLI Training Class

Welcome to NVIDIA Deep Learning Training Center (DLI) hands-on training!

In order for you to follow the teaching progress smoothly, please be sure to complete the following preparations before class:

1. Get your computer ready for training

1) The computer can access the Internet and does not need a VPN.

2) Install and use a newer version of Chrome or Firefox.

3) Turn off other irrelevant or high-traffic applications and software during training, such as video websites and computer housekeeping software.

4) If you are taking online training:

• A network cable connection is recommended over Wi-Fi.
• Guaranteed exclusive 3 Mbps network bandwidth for both upstream and downstream.
• Headphones are recommended for best audio quality and to limit background noise.

2. Create a DLI courseware platform account (to obtain courseware and experimental resources on the day of class)

1) Use Chrome or Firefox browser, click http://courses.nvidia.com/join, fill in the registered account email address, click "Sign In"; click the green text on the next page to create an account, and fill in the registration information according to the prompts.

2) Check the confirmation letter in the mailbox used to register the account, and click the button to confirm the registration.

3) Go back to 2-1) website login, fill in the relevant information, and complete the registration. caution:

• Please select "China" for the country;
• You must be 18 years old to register;
• If the hCAPTCHA verification cannot be displayed, please turn off the blocking function of the browser;
• If you encounter a "500 Error" error, please return to the URL in step 2-1), log in again, and continue to complete the registration.

4) Bookmark the URL http://courses.nvidia.com/dli-event. On the day of the official class, the lecturer will provide the Event Code, and you will be able to get the courseware at that time.

5) Test whether the computer can use the DLI courseware platform normally.

　　• Open http://websocketstest.courses.nvidia.com with Chrome or Firefox browser on the computer and network that will be used on the class day, and confirm that the results of the Websockets Test are all "Success".
　　• If there is a problem, try changing the network, or changing/updating the browser.

6) To make sure everything is in place, it is recommended that you test it out by selecting one of the free courses in DLI's "Online Self-Directed Training". Click here for a detailed graphic description. (highly recommended)
